Monthly Jobs Report

Revised August and Preliminary September Jobs Figures Released

INDIANAPOLIS (October 17, 2006) – The number of jobs in Indiana is now 13,400 higher than this time last year according to figures released today by the Indiana Department of Workforce Development.

Indiana's seasonally adjusted job figures indicate a revised August total of 2,981,800 jobs while preliminary figures for September indicate 2,980,200 jobs.

The state's non-seasonally adjusted job totals for September now stand at 3,004,800, the highest level since December 2000.

The payroll employment statistics used in the jobs report is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.

Seasonally Adjusted Figures

The nation's seasonally adjusted figures show that U.S. employment slowed in September adding just 51,000 jobs. Manufacturing declined while most other industries saw minor increases. Over the year, employment is higher by 1.8 million jobs with significant increases in professional and business services, education and health services, leisure and hospitality and construction.

Meanwhile, Indiana remains approximately 33,700 jobs off its peak, which was reached in May of 2000. The number of jobs in Indiana according to August revised data was 2,981,800, whereas September preliminary figures were 2,980,200. Seasonally adjusted employment declined slightly in September losing 1,600 jobs.

Seasonally adjusted employed changed little over the month. Among the eleven super-sectors, six increased and five declined. The biggest increase was in professional and business services which gained 1,000 and the biggest loss was 1,700 in Government. Over the year, employment is higher by 13,400 jobs. All sectors except government grew when compared to one year ago.

Non-Seasonally Adjusted Figures

Indiana's September preliminary non-seasonally adjusted payroll estimates indicate 3,004,800 jobs for the state, while August's revised total reported 2,960,600 jobs.

Unadjusted employment growth was slightly less than the most recent 10 year trend. Most of the shortfall is attributable to state government education as state universities began hiring in August for the start of the fall term, leaving fewer positions to fill in September. Layoffs and temporary shutdowns displaced 1,100 workers at automotive plants, contributing to a decline of 2,700 factory jobs. Private school students returned to classes precipitating a 12,400 gain in education and health services.

Non-Seasonally Adjusted Metropolitan Statistical Areas

Preliminary job figures in the state's Metropolitan Statistical Areas (MSA) for June, with last month's and last year's job numbers:

MSA	Sept. 06	August 06	Sept. 05
Anderson	44,700	43,500	45,700
Bloomington	84,000	81,500	83,700
Columbus	43,800	43,700	43,600
Elkhart-Goshen	132,200	132,100	130,800
Evansville	181,500	180,800	180,000
Fort Wayne	219,500	217,400	217,800
Gary	282,200	277,700	281,700
Indianapolis	900,600	891,800	901,200
Kokomo	47,600	47,100	48,100
Lafayette	94,800	89,600	95,200
Michigan City	48,400	47,600	46,600
Muncie	53,000	49,700	53,600
South Bend	147,700	145,800	148,300
Terre Haute	74,900	73,300	75,000

The Department of Workforce Development is charged with continually improving the Hoosier workforce by assisting companies to create new jobs and improve employee skills. The agency offers a variety of training and educational grants, partners with Indiana's 26 WorkOne Centers, administers the unemployment insurance system, provides labor market information, assists employers with preparing workers for layoffs and closures and operates a statewide job placement service.

Technical Notes:

- Payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.
- The survey that calculates the payroll employment estimate is conducted by the U.S. Bureau of Labor Statistics and is conducted during the week of the 12th of the month.
- In calculating employment figures, two different types of calculations are provided. The first, *non-seasonally adjusted*, provides information without taking into account the effects of seasonal trends. In calculating the *seasonally adjusted* information, employment that follows more or less a regular pattern each year, including holiday or summer employment is factored out of the estimate. The adjustments make it easier to observe the cyclical and other non-seasonal movements.
- For the most accurate analysis, please use revised data sets and not preliminary estimates.
